HS Motion Group Launches Innovative Unified Control & Motion Software

Cscape - HS Control and Motion Software and the HS Motion Suite product line are now available online

INDIANAPOLIS (8-28-13) – HS Motion Group, an alliance between Horner Automation Group and Servotronics Motion Control, announce today the launch of the innovative all-in-one control and motion software – Cscape - HS and the HS Motion suite product line offering.

In addition to downloading a free version of Cscape – HS, the all-in-one motion control software, customers can also view information and purchase products online via the web store at <http://www.hsmotion.com>.

“We are excited for manufacturers to have easy access to our product information online. The HS Motion Group is focused on providing manufacturers with seamlessly integrated machine control solutions that not only improve their time to commissioning and networking abilities, but provides a superior product at a cost-effective price,” said Phil Horner, President, Horner Automation Group.

HS Motion Group’s machine automation solution allows for deployment of controllers, drives and motors into any existing or new application. The HS Motion Suite solution enables adaptability with any machine and Cscape - HS features a integrated control and motion programming environment, which can be downloaded free on the HS Motion Group website.

To request additional information on the HS Motion Group product solution, visit <http://www.hsmotion.com> or call 855-461-4764
