For Immediate Release

## Horner Lighting Group Nationally Recognized

**INDIANAPOLIS (2-14-13)** – Horner Lighting Group's ETG-A200 outdoor parking lot lighting product is nationally recognized today in the Fifth Annual Next Generation Luminaires™ Solid-State Lighting Design Competition at the Strategies in Light conference in Santa Clara, CA.

Out of 120 outdoor entries submitted by 42 manufacturing companies. Horner Lighting Group was one of 37 that were recognized as a winner this year. This is a great achievement for Horner Lighting Group because the ETG-A200 outdoor lighting product met the competition's rigorous requirements and was considered worthy of specification.

A panel of eight judges, most of them from the architectural lighting community, evaluated the entries based on such characteristics as lighting quality, appearance, construction, serviceability, efficacy, and value.

The A200 is a pole-mounted remote phosphor LED luminaire, ideal for parking lot, area, and roadway lighting applications. The unique remote phosphor system allows for reduced glare, improved efficiency, longer life, and even illumination.

*"I want to thank the NGL team and the DOE for the awarding Horner Lighting Group, as well as, encouraging the promotion new technology in the industry. I would also like to thank the Intematix team for their support and introducing the product to the market and enabling platforms for these new technologies to emerge. The Horner lighting business is anxious to build and augment its product line with remote phosphor technology. There is a lot to be released this year,"* said Phil Horner, CEO, of Horner Lighting Group.

### About Horner Lighting Group

Horner Lighting Group, a subsidiary of Horner Electric specializes in being the main driver of innovation in the field of environmental energy. Horner Lighting Group's unique approach to the renewable energy market has led to sustaining global resources and offers a turnkey solution for a natural and viable future.
